### NEWS FROM Ms Lilian Classroom

Dear Parents,

The children have improved amazingly in all areas especially in their fluency with words. They are able to hold longer conversations. It has become a norm for us to always use the sanitizer and say our prayer before we have our meals. We can work with our materials and have them arranged nicely on our shelves.

We really appreciate our parents for their support and reinforcement of our activities.

In Mathematical Development, we are daily creating the awareness for numbers as part of everyday activities through rote counting, number rhymes, primary colours and basic shapes. We have improved greatly in our Numeracy skills: counting and identifying numbers 1-20, we can scribble and colour within a box much better. We can also identify colours of different objects –red, blue, yellow, green, purple, orange, pink, white, black and brown.

We have started major art works (making umbrellas, kites) on our theme “WEATHER”, we can tell how we feel when it is sunny- HOT and also how we feel when it is rainy -COLD. We have learnt to use our umbrellas and raincoats for protection from the rains and also to put on short-sleeved or sleeveless clothes in the dry season.

We are improving daily in our Communication and Language development through story reading, naming and identifying everyday objects and picture reading. In our Literacy, we can read and identify letters A-Z and can also identify the associating objects to these letters. We can make our sounds – s, a, t, i, p, n better with their associating objects.

What fun we had on Thursday 14th May during our picnic. It was an opportunity to reinforce all we have learnt so far on our theme ‘WEATHER’.

### A LOOK AT NEXT TWO WEEKS

- We would be looking at the RAINBOW and making WEATHER CHARTS to determine our temperature on a daily basis.
- More activities to help improve our Care Of Self, Gross Motor Skills, Eye-Hand Co-ordination, pincer grip and Care of The Environment.
